

CONTRACT RESEARCH LAB

Research and development is designed to provide the support for research, development and technological innovation relevant at all stages of company development. It serves to support the development of an innovative business with the aim of increasing the rate of new product development. The primary function of an R&D group is to develop new products.

Refsyn Biosciences Pvt Ltd specializing in custom synthesis and contract research for the pharmaceutical, biotechnology and agrochemical industries in the form of research services outsourced on a contract basis.

Our team provides synthesis of **DRUG METABOLITES** (Reference standard) compounds at the milligram to kilogram scale. Reference standards of drug metabolites are needed for their structural confirmation and pharmacologic/toxicological characterization. Metabolites are of special interest for pharmacokinetics departments of pharmaceutical companies that are engaged in drug development processes as well as for academic institutions and Clinical research studies of drugs. We develop drug metabolites for a wide range of biotechnological, pharmaceutical and chemical applications.

Our custom synthesis works on the following ways to satisfy the customer:

- ❖ Quality service
- ❖ Reducing time
- ❖ Cost effective
- ❖ Purity

We are achieving this by understand client requirement and working close with them to match their timeline.
